### ING | Assumed GDP growth

The government's budget for the coming years is currently being debated in the French Parliament. One of its aims is to reduce the public deficit from 4.9% of GDP in 2023 to 4.4% in 2024, which should stabilise public debt at the high level of 109.7% of GDP. To establish this plan, the government has assumed GDP growth of 1.4% in 2024 (after 1% expected in 2023).
